

UK REACH Regulation & SVHC – Substances of Very High Concern

Bluemay is committed to complying with UK REACH but is not directly affected by the registration of substances as the Company is neither a manufacturer nor an importer of substances.

Bluemay is involved in the importing and manufacturing of Articles but these have no intended releases (toxic emissions).

The Company's material suppliers have a legal responsibility to ensure chemicals they use are registered with the Health & Safety Executive (HSE) and are expected to act diligently within the scope of the registration requirements.

In accordance with REACH the Company requires its suppliers to review the SVHC list (UK & EU) in accordance with regulation changes and reviews and to notify Bluemay of the presence of any Candidate List substances in excess of 0.1% by weight. The Company will in turn notify customers of any relevant changes.
